Fifth: Hospitals

Accommodation beds in government hospitals in the governorates

The average bed occupancy in all hospitals was more than 246%

All hospital beds were converted into surgical beds (obstetrics and internal medicine), and an expansion was made to receive the wounded.

There is a problem with getting it out. In order to increase the bed capacity of hospitals, early discharge is made for some cases that do not occur

An expansion of additional beds was made in the corridors, tents and schools.

\*\*Note/ Bed occupancy in intensive care units is highly variable due to the large influx of cases and discharges

Early treatment of infected people, and this may expose patients to danger. A strict policy for admission to intensive care was prepared accordingly.

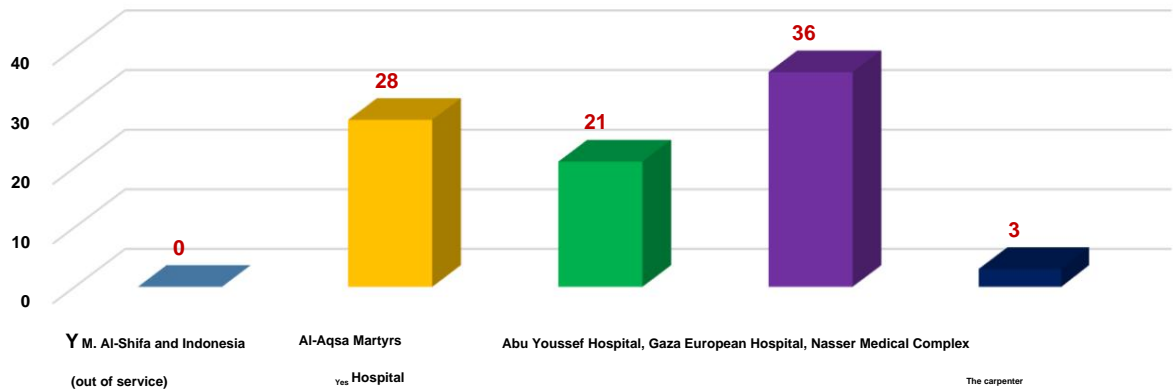

The numbers reflect the current situation.

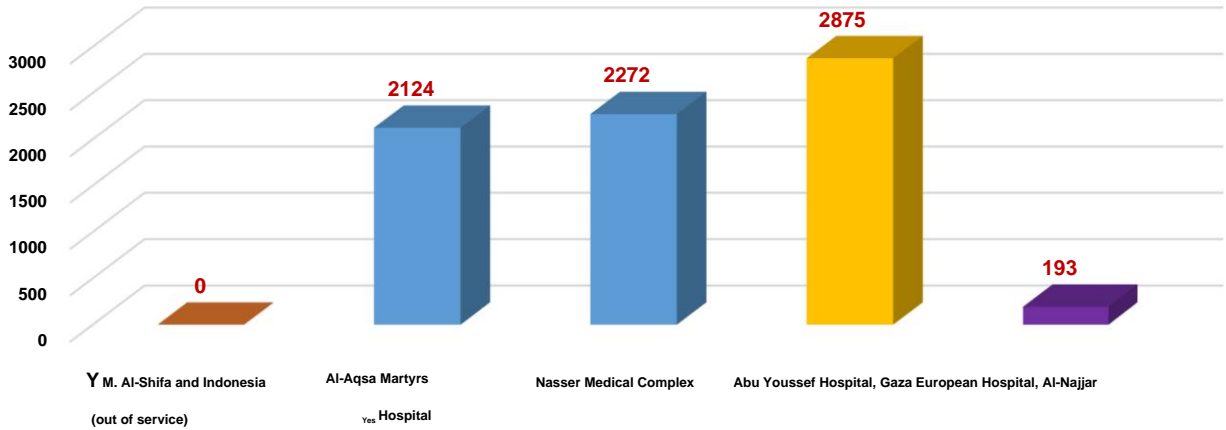

Statistics of surgical operations

The total number of daily surgical operations performed was 88 , and the total cumulative surgical operations reached 7,464 operations.

Distribution of operations according to hospitals, daily

Cumulative distribution of operations by hospital

**Note:** More than one operation was performed on more than one patient in one operating room, and some operations were performed in the corridors and in the hallway and without anesthesia.

Cases are not emptied from the recovery ward after operations are performed due to the lack of beds for the injured, as there are dozens of injured people in the recovery rooms.

Communication with the Gaza and Khan Yunis District Health Administration was lost due to the ground invasion.  The health centers operating in Khan Yunis Governorate are only the Al-Amal Clinic, in addition to the medical point in the Abdul Qader Al-Husseini School.									Notes
In the Gaza region due to the displacement of citizens to the south of the Gaza Strip A severe shortage of the nursing workforce and a limited shortage of doctors in particular  Power outages and most health centers running out of fuel stocks.  The work environment is disastrous due to the interruption of water and food supplies and the absence of security and safety.  A shortage of medicines and medical consumables and a shortage of primary care items of more than 60% of the basic list of primary care medicines.  Difficulty in getting employees to their workplaces in health centers.  Intense pressure from people visiting health centers due to the displacement of citizens and the cessation of services provided by the relief agency.  We are unable to reopen new centers to provide vaccination services due to the shortage of nursing staff.  Most UNRWA centers closed their services, increasing pressure on primary care centres.  The accumulation of displaced people in the southern regions increased work pressure on primary care centers in the south.  The overcrowding of displaced people in shelter centers in light of this cold climate has increased the spread of respiratory, skin and other infectious diseases, which constitutes  On the health system and on citizens. Dangerous  Attack on working crews by citizens, as one of the doctors at the Joura El Lotto Center was assaulted on the head of the Administrative Affairs Department in  Sheikh Radwan Center and Ali the pharmacist at the Zaytoun Martyrs Center (chaos in all our centers as citizens exceed all limits by charging their mobile phones  And batteries for their homes, and for filling water...etc.									Obstacles
